RE: Chatham County Wage Survey - 1981
Project A-1287-007

Dear Sanford:

Enclosed are the original and two copies of the 1981 Chatham County Wage Survey. If you have no recommended changes, this will serve as the final report for Project No. A-1287-007.

Attached is a list of the companies surveyed, with the name and title of the individuals contacted. Since practically all the companies requested a copy of the survey result, I recommend a general mailing to all who participated. A large number of the individuals interviewed had the 1979 edition readily available and indicated that the data had been useful.

The 1981 survey differs from the 1979 survey in the following respects:

1. Rexnord, Inc., has been added to the Metal Working Section.
2. EM Laboratories has been added to the Chemical Processing Section.
3. The total fringe benefits (as a percent of gross payroll) offered by each company has been added in the Fringe Benefits Sections. However, only eight of the 28 companies interviewed had this figure currently available.
4. Representative skills are listed for some of the journeymen and helper classifications in the Metal Working Section to provide more specific information.

Mr. B. Sanford Ulmer
page 2

The following information was received in regard to the participation of the firms in other wage surveys:

- a) 11 percent conduct formal (mail) annual wage surveys.
- b) 25 percent conduct informal (telephone) annual wage surveys.
- c) 18 percent conduct informal wage surveys every 2 - 3 years.
- d) Practically all the firms participate in other formal wage surveys. Those most frequently mentioned were conducted by the U. S. Army (Fort Stewart), Gulfstream American, American Cyanamid, and the American Society of Personnel Administrators.

We appreciate the opportunity to conduct this study for the Savannah Port Authority. Please contact me if you have any requested revisions to the report as submitted.

With highest regards,

Larry R. Edens
Director - Savannah Area Office
